

"Enabling People through Process and Technology"

Business Management Software Solutions

Understanding the Requirements

Turn-Key Solutions

Sophix Solutions is a Microsoft Silver Certified ERP Partner, specializing in the Dynamics GP and the Dynamics CRM product lines. We implement comprehensive, turn-key business management software solutions. The initial phase of our process incorporates a detailed needs analysis, that will identify an organization's specific software requirements. Once we have confirmed the software "fit", we will initiate the second phase of the project which includes the physical Installation of the software, the Configuration of the software and End-User Training. The final phase of the project incorporates Report Writing, Parallel testing and Post-Live Support. Throughout all phases of the project, we adhere to a project management approach that establishes consistency and continuity for the project team.

Experience Matters

Sophix Solutions has the experience of working with many organizations to implement and support business management software solutions. Our commitment to excellence begins with the initial requirements analysis and continues on through post-live support. We have worked with companies in varying industries from Agriculture, Distribution, Healthcare, Hospitality, Manufacturing and Services. Our cross-industry experience has challenged us to think "outside the box" when designing the application configuration for our clients.

This extensive experience has also enabled us to leverage our system application knowledge and apply it to various customer situations to reduce the overall time to implement our business management software solutions. The end result is that our streamlined methodologies help us deliver a lower Total Cost of Ownership (TCO) for the software solutions we implement.

Commitment to Excellence

Sophix Solutions adheres to a business philosophy of maintaining the highest ethical standards when consulting with our customers. Our goal is to facilitate long-term, mutually-beneficial business relationships. We are also committed to providing the best possible environment to promote professional and personal growth for our associates and partners. We believe the greatest Return on Investment (ROI) that we can expect is a tenured consultant and customer
