AccellosOne EDI
for Microsoft Dynamics® GP

Features and Benefits
Built Specifically for Microsoft Dynamics® GP AccellosOne EDI for Microsoft Dynamics® GP addresses several common areas companies often overlook in implementing an EDI strategy and prevents increased cost of EDI, impacted profit margins, reduced efficiency, and often negatively impacted customer satisfaction.

Integration To Your Business System
On Average, Accellos customers process EDI orders 4 times faster than they did with a non-integrated EDI solution. They also experience a 15% improvement in order accuracy. AccellosOne EDI takes advantage of the Microsoft Dynamics® GP architecture to provide the highest level of integration and automated workflows possible. Your employees open Microsoft Dynamics® GP with EDI orders already entered into the system, EDI acknowledgements, created invoices, or with orders flagged for your review. Flagged orders are prompted with notifications for your employees to review, cutting down on processing time.

### Always Current On Latest Version Releases
AccellosOne EDI for Microsoft Dynamics® GP is built specifically for Microsoft Dynamics® GP. As a Microsoft Gold Certified Partner we have demonstrated our commitment to the Microsoft Dynamics family of products by achieving an additional Microsoft competency for embedded solutions. Our close relationship with Microsoft provides you with peace of mind knowing that when Microsoft releases a new version of Microsoft Dynamics® GP, AccellosOne EDI will always be compatible.
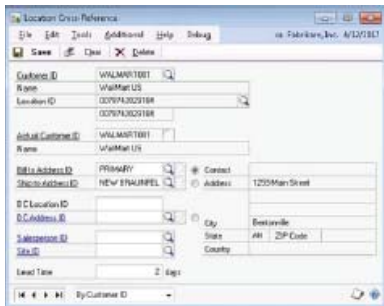

Scalability
AccellosOne EDI, like Microsoft Dynamics, makes distributing workflows to your organization easy. AccellosOne EDI can handle your EDI processing whether your company processes 15 orders per week or 15,000. Customers have the ability to trade all customer-required EDI documents and even some more obscure ones like EDI Point-of-sale, release accounting, and others. AccellosOne EDI includes Gentran, the leading EDI translator from Sterling Commerce enabling you to have as much or as little hands-on management of your EDI program as you would like.

Simple Additions, Set-Ups, And Changes
Accellos takes the pain out of adding new trading partners and keeping up with changing customer requirements. Accellos also provides a library of more than 1,000 Trading Partner Kits which are built specifically for Microsoft Dynamics GP and the Gentran translator. Trading Partner Kits contain templates for all required documents by trading partner. An added bonus is the fixed cost model

AccellosOne EDI for Microsoft Dynamics GP

you'll have for adding new trading partners. You can elect to purchase Kits as you bring on new trading partners, or arrange for unlimited access to our library.

Smart Processing

AccellosOne EDI is unique in that we give customers the ability to talk to Microsoft Dynamics® GP. Our cross reference tables enable customers to create unique trading partner-specific business rules, designed to catch and fix problems before they happen. The system will scan each order and make the necessary corrections, or take appropriate actions, according to the business rules you define. Some of your customers may require that specific data be included on EDI order acknowledgements or EDI invoices – Accellos can do that for you which automatically ensures that you are always in compliance with your trading partner's unique EDI requirements.

Service

Accellos' Professional Services Consultants have extensive experience working with Microsoft Dynamics ERP systems, EDI processing, fulfillment and shipping, trading partner compliance, supply chain compliance, order fulfillment and shipping. As part of Accellos' commitment to service, we require that all of our Consultants are CompTia Project+ certified, reflecting our commitment to following industry specific best practices for Project Management. Our proven implementation methodology provides complete visibility to project status that includes customers and additional third parties if required. Our Support team consists of HDI (Help Desk Institute) certified Analysts. HDI certification helps to ensure we are providing consistent and exemplary customer support to clients We require ongoing measurement of our support metrics against stringent Service Level Agreements in an effort to provide customers with a level of support that consistently exceeds expectations.

Application And Market Knowledge

Our knowledge of EDI, the market, and Microsoft Dynamics® GP combined with the knowledge of supporting nearly 700 customers ensures that you'll get the most effective service and assistance from our support team. Other EDI solutions may know EDI but lack your business application knowledge. Accellos understands how companies utilize Microsoft Dynamics® GP in a variety of industries from automotive to distribution to drive their business and can guide you as you encounter process questions from the knowledge gained by serving and supporting our customers.
