

# ADVANCED BOM

*Advanced BOM provides the complete BOM/Assembly solution you've been waiting for.*

## FUNCTION

The *Advanced BOM* core shows maximum quantity that can be assembled and provides shortage options and reports when releasing an assembly. Sales documents and assembly orders are linked. Additionally, purchase orders may be generated from assembly orders. *Advanced BOM* also lets you issue finished goods to be disassembled and returns component items back to stock.

## IMPACT

*Advanced BOM* provides the complete BOM/Assembly solution you've been waiting for.

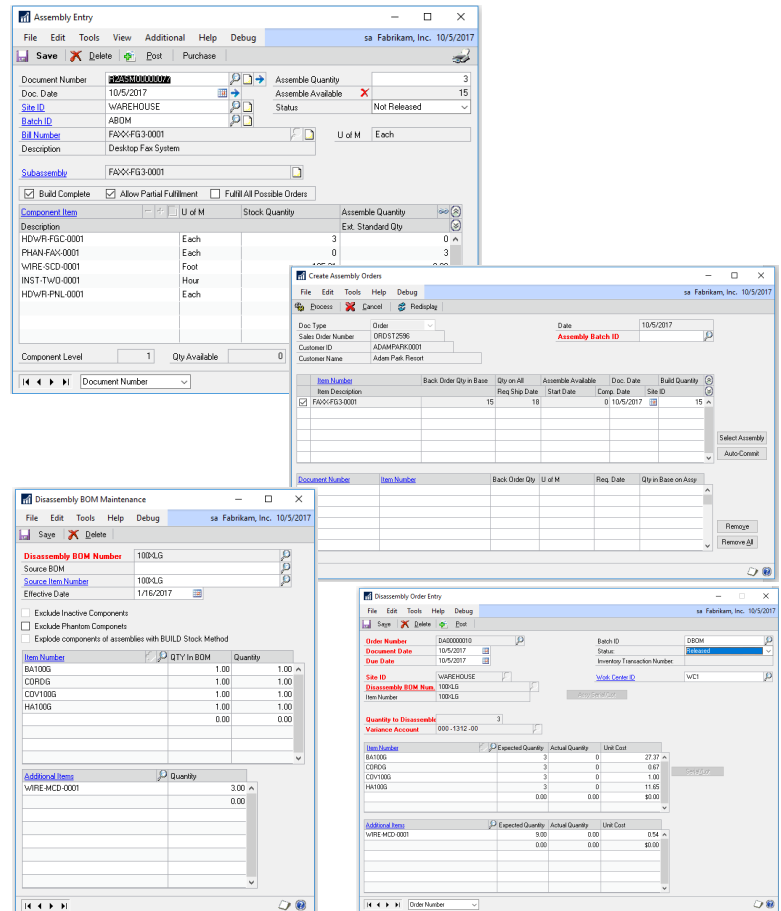

## FEATURES

- Assembly orders can be generated from Sales Order Entry or you can link existing assembly orders to a sales document.
- The 'Build Complete' option can be used to modify assembly quantity based on available components
- Component shortages can automatically create linked purchase orders or lines on existing purchase orders
- Components may be added to or deleted from a Disassembly Order manually at order entry time

## BENEFITS

- Eases the process of assembling items for specific orders
- Provides support for repair and salvage operations
- Simplifies the disassembly process with full audit trail
