

# ADVANCED USER-DEFINED FIELDS

*Advanced User-Defined Fields extends the data elements in master records and documents.*

## FUNCTION

*Advanced User-Defined Fields* provides a versatile array of user-configurable fields to extend master records and document headers and lines.

## IMPACT

With *Advanced UDF*, the user may configure more than 60 fields, in an assortment of data types to extend the Inventory Item Master, Customer Master, Vendor Master, Purchase Order Header and/or Line, and the Sales Order Header and/or Line. Fields may also be designated as required.

## FEATURES

- More than 60 configurable fields: 15 user-defined lists, 10 numeric, 10 checkbox, 5 date, 3 currency, 20 string and 3 big string fields
- User-defined field labels
- Fields may be designated as required
- Line-level fields may be configured to default from Header fields or be independent
- Displays only the fields that are configured with a field label
- Tables contain field label names for easy selection when used with SmartLists and other system reporting tools
- If used in conjunction with *Operations Core*, many can be configured to be sent to the warehouse system

Contact your Microsoft Dynamics® GP partner and discover how *Advanced User-Defined Fields* can work for your organization.

The image displays two screenshots of the Advanced User-Defined Fields (UDF) configuration interface. The top window, titled "Advanced UDF Setup - TWOR2 (sa)", shows a list of fields (List 1 through List 25) and checkboxes for "Required" and "Warehouse" status. The bottom window, titled "Item Advanced UDF Maintenance - TWOR2 (sa)", shows the configuration for a specific item (40RPRDC). It displays various fields such as Vendor, Color, Style, Size, Mig Time, Ship Time, Euro Value, Canadian Value, and Date Fields, with their respective values and checkboxes for "Required" and "Warehouse" status.
