

JAT eStubs

Enhancement to Payroll

JAT eStubs allows you to email pay stubs to your employees directly from your payroll system.

Following each payroll process, **eStubs** provides:

- A log file you can browse and sort that shows all employees receiving an email, including their email address.
- A count of the number of emails sent.
- Individual Adobe Acrobat PDF files for each employee that can be printed or re-sent if necessary.

With **eStubs**, you can email pay stubs through Outlook or SMTP. If **eStubs** encounters any employees with missing email addresses, **eStubs** will alert you.

How It Works

After running a payroll schedule, an **eStubs** extract file is created. This extract file contains detailed payroll and address information, leave balances and control table information for Earning, Deduction and Department codes. You are then able to process the payroll extract file and send emails to all employees who elected to participate.

Solution Investment

eStubs software prices are good through April 30, 2013. The **JAT eStubs** Software Enhancement Plan is required for first year customers. The annual fee is based on 20% of the current software price and includes software upgrades and updates, plus two (2) support incidents.

<u>Active Employees</u>	<u>JAT eStubs for Dynamics GP (Modular Based & Business Ready Licensing)</u>
1-100	\$1,000.00
101-250	\$1,500.00
251-500	\$2,000.00
501-1,000	\$2,500.00
1,001-2,000	\$3,000.00
Unlimited	\$4,000.00

Client Quote

"We want to tell you how pleased we are with the eStubs application. Your software engineers put in an amazing amount of work in the design, testing and fine-tuning of this system and the product is exactly what we wanted! The screens are quite nice-looking, yet simple and easy to use, and the stubs themselves are very attractive. The instruction manual is also very straightforward and easy to understand. Your attention to detail really shows. eStubs is absolutely perfect and we want you to know how VERY much we appreciate it."
