

INTRODUCING

MULTI-BATCH PRINT & POST

CUT THE
EMPLOYEE-HOURS
DEVOTED TO
SIMPLY PRINTING
CHECKS OR
CREATING EFT
PAYMENTS BY

75%
OR MORE!

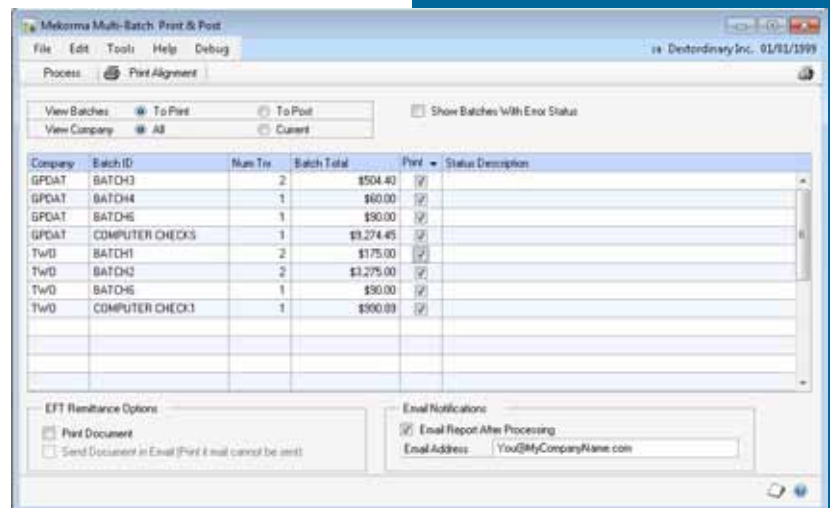

The easiest way to print checks and generate EFTs from multiple checkbooks and across companies.

IT'S SIMPLE:

Build payment batches by any means you're accustomed to:

- ✓ any of the native GP tools
- ✓ Binary Stream's Multi-Entity Management
- ✓ Mekorma's Check Selection Plan
- ✓ or any other means

then from one simple screen select any or all payment batches from one or all companies and print them with a single click. Multi-Batch Print and Post will send your batches to the printer, change companies when necessary and alert you when printing is complete.

Finally, confirm the output and then post with a single click from the same convenient screen.
