

Grower Cost Management

Integrated transportation software solutions that help drive your business...

Grower Cost Management enables growers to gain control and insight into the profitability of their business.

Granularly analyze the work orders, equipment and machine utilization, parts and labor costs that affect your bottom line all as an integrated solution to your Microsoft Dynamics GP system.

The screenshot displays the software interface for entering and processing work orders. The main window shows a 'Work Order#' form with fields for Field, Crop, Variety, Season, and Action Code. Below this are three summary tables: 'Employee' (with columns for Seq, Date Worked, Starting, Ending, #Hours, \$-Rate, \$-Total), 'Item Number and Description' (with columns for Seq, Date Used, Qty Used, UOM, \$-Cost Ea, \$-Total), and 'Machine ID and Description' (with columns for Seq, Date Utilized, Starting, Ending, #Hours, \$-Total). Summary totals are shown at the bottom: Total Labor (\$0.00), Total Parts (\$0.00), Total Machine/Equip (\$0.00), and Total Cost (\$0.00). A 'Work Order Comments' field is also present.

An overlaying 'Processing Option' dialog box is shown, with the following fields: Processing Option (Voucher Farm Expense (to PM)), Date (4/12/2007), Description, Vendor, Transaction Type (Invoice), Due Date, Document#, Posting Batch Name (TRUCK FREIGHT), and \$-Total Amount. Below these fields is a table for distribution:

Field ID & Description	\$-Amount	
Crop ID & Description		
Variety ID & Name		
Season ID & Description		
Action ID & Description		
Description	Quantity	\$-Cost Each
		\$0.00
		\$0.00
	0.00	\$0.00

At the bottom of the dialog, there are fields for 'Total Distribution' and 'Remaining to Distribute', and buttons for 'GL Account Distributions', 'Process', 'Clear', and 'Cancel'.

Features List

- Action codes allow for tracking by type (Hilling/Tilling/Planting etc.)

Make your company people ready

Integrated transportation software solutions that help drive your business...

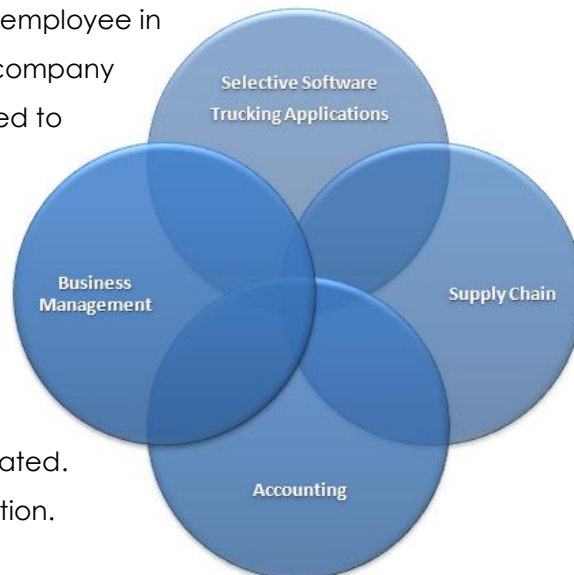

A people-ready business is one where people can apply their unique skills, insights and experience to create new products and services, work responsively with customers and partners, and drive operational excellence in every aspect of the business. People-Ready businesses support people with knowledge, practices and tools so they can add extra value that helps differentiate successful organizations in a competitive, fast-moving global economy. An investment in Microsoft Dynamics and Selective Software is designed to help businesses achieve this goal.

Microsoft Dynamics GP is an integrated, powerful financial and supply chain management solution that is streamlined for ease of installation, rapid user adoption, and affordability that gives companies an effective way to record, manage, and access the information they need to manage the essential functions of their organization.

With the addition of Selective Software's industry specific Farming and Trucking solutions your company is equipped end-to-end as never before with solutions to enable every employee in every functional area of the company with the specific tools they need to succeed.

Because all modules and every step of your business process are fully integrated, silos of information and redundant data entry is eliminated. There is one version of information.

Data integrity, reliability and access to it is possible as can only be the case with an integrated solution.

Required Module

- Trucking Application Base System
